

TERM 3 COVID INFORMATION

Welcome to the start of Term 3, after hopefully enjoying a safe and enjoyable winter break. I want to give you an overview of how we are continuing to ensure our school remains COVID-safe throughout this term.

As we continue to prioritise student and staff learning and wellbeing while at school, our layered COVID-smart measures will continue for Term 3. These 'baseline measures' are aligned to the NSW Government's general community settings and include:

What's new in Term 3 ?

As winter continues, our COVID-smart measures have been updated in consultation with NSW Health to provide appropriate protection to our school community.

Boosted day cleaning. The department has made a slight change to its cleaning process. Cleaning of school sites will now be more concentrated during the day, with an increase in cleaning in school hours, and a subsequent reduction out of hours. Boosted day cleaning will continue to focus on high-touch areas and other hard surfaces, door handles, lockers, light switches and handrails in stairways and movement areas.

What's continuing for Term 3 ?

Masks. Masks are an effective way of minimising the transmission of respiratory viruses and infections, and protecting our community, especially those who are at higher risk of severe illness from COVID-19 and flu. We strongly encourage all students and staff wear a mask for the first 4 weeks of Term 3, particularly in indoor settings or when distancing is not possible. The latest NSW Health advice also recommends wearing a mask for people who have recovered from COVID-19 and recently completed their 7-day isolation period for an additional 3 days (from days 8 to 10 after receiving a positive COVID-19 result). Additionally, as outlined in the below section on household contacts, mask wearing is mandatory for staff and high school students returning to school as household contacts for 5 school days and strongly recommended for primary school students returning to school as household contacts for 5 school days. Students or staff identified as household contacts who are unable to wear a mask will be supported to learn or work remotely.

Rapid antigen tests (RATs). The department have sent another round of RATs to our school which are attached as a 1 multipack of 5 RAT kits per student. These RATs can be used as required for symptomatic testing, such as if your child is displaying even mild symptoms. Beyond this provision, if you require additional RATs let the school know that you need more and we will try and assist. Additionally, our school will be maintaining a reserve stock of RATs onsite to support symptomatic testing in the event of an outbreak in our school community. Please also remember that positive RAT results must be registered with Service NSW, and students who test positive to COVID-19 must not attend school until their isolation period ends and they are symptom free.

Household contacts. Students identified as household contacts remain able to attend school providing they are symptom free, notify the school and return a negative COVID-19 test result daily for 5 consecutive school days. Primary students, while not required, are strongly encouraged to wear a mask for 5 consecutive school days (except when eating/drinking or exercising).] Please note that students identified as household contacts are still unable to attend overnight excursions, including camps. Visitors identified as household contacts who are engaging directly with students are required to return a negative COVID-19 test result before attending our school and wear a mask.]\

Responding to our local situation. We will continue to liaise with NSW Health and the department's Health, Safety and Staff Wellbeing Case Management team to ensure our COVID-smart settings keep up with the latest developments. If local conditions require it, this may mean reintroducing temporary additional COVID-smart measures to act as a 'circuit breaker', including:

- mandating mask wearing for all staff and students in Year 7 and above (high school settings)
- mandating mask wearing for all staff (primary school settings)
- postponing or limiting non-essential activities like excursions, indoor assemblies and visitors to the school
- directing cohorts to learn remotely for short periods of time.

Maximising natural ventilation. The department has reviewed environmental differences across NSW as part of their winter ventilation planning to ensure that local climatic conditions at each school are considered. The department will continue to provide local guidance to schools, including advice on maximising natural ventilation while balancing thermal comfort and the use of indoor and outdoor learning areas for school activities to support schools to adapt to local climate conditions throughout the winter months.

Reducing the risk of illness this winter. Finally, it is important to note NSW Health's advice to reduce our risk of not only COVID-19, but other illnesses that may affect our school at this time of year such as the flu and respiratory syncytial virus (RSV)[External link](#), both of which can be serious in younger people. We can all protect our loved ones and our community by:

- staying home and getting tested if unwell or displaying any symptoms
- keeping up to date with our vaccinations – including the flu vaccine, which is available from your local GP, pharmacy or Aboriginal Medical Service now
- flu vaccines are free for all children aged 6 months to under 5 years, or for a small charge for those aged 5 years and older
- getting tested immediately for COVID-19 if you become symptomatic and isolating until you receive a negative result and are symptom free
- practicing good hand hygiene by washing regularly with soap and water
- taking a RAT before visiting vulnerable loved ones or going to large gatherings and events.

If you have any questions about the above information, please call our school office so we can assist you.

Simon Dunn

Rel. Principal.
